

AMENDMENTS TO THE SPECIFICATION

Please amend the paragraph bridging pages 6-7 as follows:

-- Either of the analogue control sticks 23R and 23L is held ~~ele~~^{erect} (not inclined) while it is not operated, as illustrated in FIG. 2. This position is referred to as home position. When a player inclines the analogue control stick 23R or 23L, the controller 10 detects values of X-Y coordinates in accordance with the inclination angle and direction of the operated analogue control stick 23R or 23L from its home position, and outputs the coordinate values as an operation output. --
